Preface

Welcome to "Advanced Tally Prime: Modules and GST," a comprehensive guide designed to equip you with the skills and knowledge required to harness the power of Tally Prime for advanced accounting and taxation tasks. In this book, we delve into the intricate world of Tally Prime, exploring its various modules and focusing specifically on the Goods and Services Tax (GST) functionality.

This book is an essential resource for those who have already mastered the basics of Tally Prime and are ready to take their skills to the next level. Whether you are an accountant, a business owner, or a professional seeking to enhance your knowledge of Tally Prime, this guide will serve as your trusted companion.

T

his book is dedicated to the Goods and Services Tax (GST) module in Tally Prime. As GST has revolutionized the taxation landscape in many countries, it is crucial for businesses to understand its implications and ensure compliance. We will guide you through the setup and configuration of the GST module, demonstrate how to create and manage GST-compliant transactions, and generate accurate GST reports.

Throughout this book, we adopt a hands-on approach, providing step-by-step instructions, practical examples, and tips to optimize your Tally Prime experience. Our goal is to enable you to navigate the intricacies of Tally Prime confidently, ensuring you make the most of its powerful features and modules.

We hope this book serves as a valuable resource on your journey towards mastering Tally Prime and leveraging its potential for your business or profession. By the end of this book, we are confident that you will have gained the skills and confidence necessary to navigate the complexities of Tally Prime's advanced modules and the GST functionality.

The content development team of GJ has put in tremendous effort in bringing out this publication and the team looks forward to your valuable suggestions and recommendations for the improvement of this book.

Introduction to GST

What are Goods and Service Tax (GST)?

It is a destination-based tax on consumption of goods and services. It is proposed to be levied at all stages right from manufacture up to final consumption with credit of taxes paid at previous stages available as setoff. In a nutshell, only value addition will be taxed and burden of tax is to be borne by the final consumer.

What are GST rate slabs?

The Goods **and** Services Tax (GST) will be levied at multiple rates ranging from 0 per cent to 28 per cent. GST Council finalized a four-tier GST tax structure of 5%, 12%, 18% and 28%, with lower rates for essential items and the highest for luxury and de-merits goods that would also attract an additional cess.

Service Tax will go up from 15% to 18%. The services being taxed at lower rates, owing to the provision of abatement, such as train tickets, will fall in the lower slabs.

In order to control inflation, essential items including food, which presently constitute roughly half of the consumer inflation basket, will be taxed at zero rate.

The lowest rate of 5% would be for common use items. There would be two standard rates of 12 per cent and 18 per cent, which would fall on the bulk of the goods and services. This includes fast-moving consumer goods.

Highest tax slab will be applicable to items which are currently taxed at 30-31% (excise duty plus VAT).Ultra luxuries, demerit and sin goods (like tobacco and aerated drinks), will attract a cess for a period of five years on top of the 28 per cent GST.

The collection from this cess as well as that of the clean energy cess would create a revenue pool which would be used for compensating states for any loss of revenue during the first five years of implementation of GST.

Finance minister said that the cess would be lapsable after five years.

The structure to agree is a compromise to accommodate demand for highest tax rate of 40% by states like Kerala. While the Centre proposed to levy a 4% GST on gold but the final decision on this was put off. During a press conference, finance minister Mr. Jaitley said, "GST rate on gold will be finalized after the fitting to the approved rates structure of all items is completed and there is some idea of revenue projections".

The principle for determining the rate on each item will be to levy and collect the GST at the rate slab closest to the current tax incidence on it.

The GST will subsume the multitude of cesses currently in place, including the Swachh Bharat Cess, the Krishi Kalyan Cess and the Education Cess. Only the Clean Environment Cess is being retained, revenues from which will also fund the compensations.

Which of the existing taxes are proposed to be subsumed under GST?

GST is set to replace various taxes as mentioned below:

The GST Council shall make recommendations to the Union and States on the taxes, cesses and surcharges levied by the Centre, The States and the local bodies which may be subsumed in the GST

What will be status of Tobacco and Tobacco products under the GST regime?

Tobacco and tobacco products would be subject to GST. In addition, the Centre would have the power to levy Central Excise duty on these products

Taxation of such Commodities in GST Regime	The existing taxation system (VAT & Central Excise) will continue in respect of the above commodities.
Commodities Proposed to be kept outside GST	Alcohol for human consumption, Petroleum Products viz. petroleum crude, motor spirit (petrol), high speed diesel, natural gas and aviation turbine fuel & Electricity.

Taxes currently levied and collected by the Centre	State taxes that would be subsumed under the GST
Central Excise duty	State VAT
Duties of Excise (Medicinal and Toilet Preparations)	Central Sales Tax
Additional Duties of Excise (Goods of Special Importance)	Luxury Tax
Additional Duties of Excise (Textiles and Textile Products)	Entry Tax (all forms)
Additional Duties of Customs (commonly known as CVD)	Entertainment and Amusement Tax (except when levied by the local bodies)
Special Additional Duty of Customs (SAD)	Taxes on advertisements
Central Surcharges and Cesses so far as they r	Taxes on lotteries, betting and gambling
elate to supply of goods and services	I State Surcharges and Cesses so far as they relate to supply of goods and services
Service Tax	Purchase Tax

JGI Jain Group - Bengaluru
G-TEC JAINx EDUCATION

What type of GST is proposed to be implemented?

It would be a dual GST with the Centre and States simultaneously levying it on a common tax base. The GST to be levied by the Centre on intra-State supply of goods and I or services would be called the Central GST (CGST) and that to be levied by the States would be called the State GST (SGST). Similarly, Integrated GST (IGST) will be levied and administered by Centre on every inter-state supply of goods and services.

Which authority will levy and administer GST?

Centre will levy and administer CGST & IGST while respective states will levy and administer SGST.

How a particular transaction of goods and services would be taxed simultaneously under Central GST {CGST) and State GST {SGST)?

The Central GST and the State GST would be levied simultaneously on every transaction of supply of goods and services except the exempted goods and services, goods which are outside the purview of GST and the transactions which are below the prescribed threshold limits. Further, both would be levied on the same price or value unlike State VAT which is levied on the value of the goods inclusive of CENVAT. While the location of the supplier and the recipient within the country is immaterial for the purpose of CGST, SGST would be chargeable only when the supplier and the recipient are both located within the State.

Illustration I: Suppose the rate of CGST is 9 % and that of SGST is 9 %. When a wholesale dealer of steel in Uttar Pradesh supplies steel bars and rods to a construction company which is also located within the same State for, say RS. 100, the dealer would charge CGST of RS. 9 and SGST of RS. 9 in addition to the basic price of the goods.

He would be required to deposit the CGST component into a Central Government account while the SGST portion into the account of the concerned State Government. Of course, he need not actually pay RS. 18 (Rs.9 + RS.9) in cash as he would be entitled to set-off this liability against the CGST or SGST paid on his purchases (say, inputs). But for paying CGST he would be allowed to use only the credit of CGST paid on his purchases while for SGST he can utilize the credit of SGST alone.

In other words, CGST credit cannot, in general, be used for payment of SGST. Nor can SGST credit be used for payment of CGST.

Illustration II: Suppose, again the rate of CGST is 9 % and that of SGST is 9 %. When an advertising company located in Mumbai supplies advertising services to a company manufacturing soap also located within the State of Maharashtra for, let us say RS. 100, the ad company would charge CGST of RS.9 as well as SGST of RS. 9 to the basic value of the service.

He would be required to deposit the CGST component into a Central Government account while the SGST portion into the account of the concerned State Government. Of course, he need not again actually pay RS. 18 (RS. 9 + Rs. 9) in cash as it would be entitled to set-off this liability against the CGST or SGST paid on his purchase (say, of inputs such as stationery, office equipment, services of an artist etc.). But for paying CGST he would be allowed to use only the credit of CGST paid on its purchase while for SGST he can utilize the credit of SGST alone.

In other words, CGST credit cannot, in general, be used for payment of SGST. Nor can SGST credit be used for payment of CGST.

What is IGST?

Under the GST regime, an Integrated GST (IGST) would be levied and collected by the Centre on inter-State supply of goods and services. Under Article 269A of the Constitution, the GST on supplies in the course of inter-State trade or commerce shall be levied and collected by the Government of India and such tax shall be apportioned between the Union and the States in the manner as may be provided by Parliament by law on the recommendations of the Goods and Services Tax Council.

How GST returns will be filed?

For properly updating. The invoices, Indian taxpayers and businesses have to file certain returns with the Government. These returns have to be mandatorily filed as any non-compliance towards the same may lead to disallowance of input tax credit, apart from attracting penalties and interests, etc. Proper filing of information and passing the same in the returns is a mandatory process for smooth flow of credit to the last recipient.

The returns have been designed so that all transactions are in sync with each other and that no transaction is left unattended between the buyer and the seller. All the data is stored in GSTN, which can be accessed by the users/taxpayers anytime online.

Depending on the type of GST registration (Regular, Composite, etc.) businesses will need to file up to 37 GST returns every year. These returns can be filed using any Tally Software.

What would be the role of GST Council?

A GST Council would be constituted comprising the Union Finance Minister (who will be the Chairman of the Council), the Minister of State (Revenue) and the State Finance/Taxation Ministers to make recommendations to the Union and the States on

1. The taxes, cesses and surcharges levied by the Centre, the States and the local bodies which may be subsumed under GST;
2. The goods and services that may be subjected to or exempted from the GST;
3. The date on which the GST shall be levied on petroleum crude, high speed diesel, motor sprit (commonly known as petrol), natural gas and aviation turbine fuel;
4. Model GST laws, principles of levy, apportionment of IGST and the principles that govern the place of supply;
5. The threshold limit of turnover below which the goods and services may be exempted from GST;
6. The rates including floor rates with bands of GST;
7. Any special rate or rates for a specified period to raise additional resources during any natural calamity or disaster;
8. Special provision with respect to the North- East States, J&K, Himachal Pradesh and Uttara hand; and
9. Any other matter relating to the GST, as the Council may decide.

Who is liable to pay GST under the proposed GST regime?

Under the GST regime, tax is payable by the taxable person on the supply of goods and/or services. Liability to pay tax arises when the taxable person crosses the threshold exemption, i.e. Rs.40 lakhs for goods and for service Rs- 20 lakh for normal category state (special category - RS.20 lakhs for NE States) except in certain specified cases where the taxable person is liable to pay GST even though he has not crossed the threshold limit. The CGST I SGST is payable on all intra- state supply of goods and/or services and IGST is payable on all inter- State supply of goods and/or

JGI COMPUTER EDUCATION Jain Group - Bengaluru
GTECHNIX EDUCATION

services. The CGST /SGST and IGST are payable at the rates specified in the Schedules to the respective Acts.

What are the benefits available to small tax payers under the GST regime?

Tax payers with an aggregate turnover in a financial year up to Rs.40 lakhs for goods and for service Rs- 20 lakh for normal category state (special category - RS.20 lakhs for NE States) would be exempt from tax.

[Aggregate turnover shall include the aggregate value of all taxable and non-taxable supplies, exempt supplies and exports of goods and/or services and exclude taxes viz. GST.]

Aggregate turnover shall be computed on all India basis. For NE States and Sikkim, the exemption threshold shall be [RS. 20 lakhs]. All taxpayers eligible for threshold exemption will have the option of paying tax with input tax credit {ITC) benefits. Tax payers making inter-State supplies or paying tax on reverse charge basis shall not be eligible for threshold exemption

How will the goods and services be classified under GST regime? What is HSN under GST?

HSN (Harmonized System of Nomenclature) code shall be used for classifying the goods under the GST regime. Taxpayers whose turnover is above RS. 1.5 crores but below RS. 5 crores shall use 4 digit code and the taxpayers whose turnover is RS. 5 crores and above shall use 6 digit code. Taxpayers whose turnover is below RS. 1.5 crores are not required to mention HSN Code in their invoices. Services will be classified as per the Services Accounting Code (SAC).

How will imports be taxed under GST?

Imports of Goods and Services will be treated as inter-state supplies and IGST will be levied on import of goods and services into the country. The incidence of tax will follow the destination principle and the tax revenue in case of SGST will accrue to the State where the imported goods and services are consumed. Full and complete set-off will be available on the GST paid on import on goods and services.

How will Exports be treated under GST?

Exports will be treated as zero rated supplies. No tax will be payable on exports of goods or services, however credit of input tax credit will be available and same will be available as refund to the exporters.

What is the scope of composition scheme under GST?

Small taxpayers with an aggregate turnover in a financial year of Rs. = < 1.5 CR for goods and for services of RS.< 50 lakhs for normal category states and special category state Rs.< 75 Lakh. shall be eligible for composition scheme. Under the scheme, a taxpayer shall pay tax as a percentage of his turnover during the year without the benefit of ITC. The floor rate of tax for CGST and SGST shall not be less than [1%].A tax payer opting for composition levy shall not collect any tax from his customers. Tax payers making inter- state supplies or paying tax on reverse charge basis shall not be eligible for composition scheme.

Please note that the composition scheme is optional.

What is GSTN and its role in the GST regime?

GSTN stands for Goods and Service Tax Network (GSTN). A Special Purpose Vehicle called the GSTN has been set up to cater to the needs of GST. The GSTN shall provide a shared IT infrastructure and services to Central and State Governments, tax payers and other stakeholders for implementation of GST. The functions of the GSTN would, inter alia, include:

*Facilitating registration;

*Forwarding the returns to Central and State authorities;

*Computation and settlement of IGST;

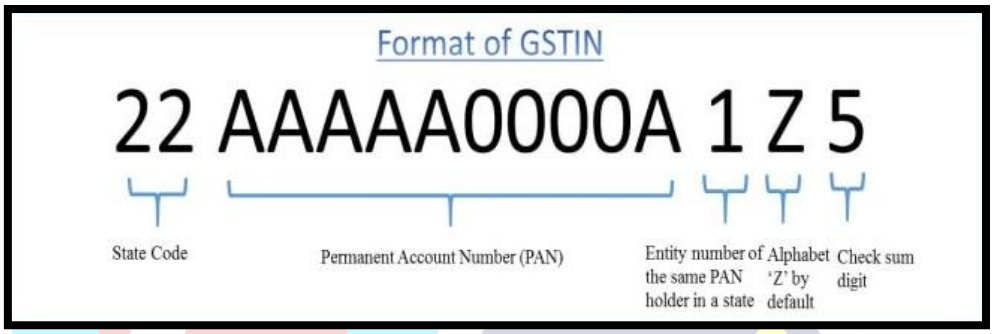

*Matching of tax payment details with banking network;

*Providing various MIS reports to the Central and the State Governments based on the tax

*Payer return information;

*Providing analysis of tax payers' profile; and
*Running the matching engine for matching, reversal and reclaim of input tax credit.

The GSTN is developing a common GST portal and applications for registration, payment, return and MIS/ reports. The GSTN would also be integrating the common GST portal with the existing tax administration IT systems and would be building interfaces for tax payers. Further, the GSTN is developing back-end modules like assessment, audit, refund, appeal etc. for 19 States and UTs (Model II States). The CBEC and Model I States (15 States) are themselves developing their GST back-end systems. Integration of GST front-end system with back-end systems will have to be completed and tested well in advance for making the transition smooth.

Is Your Business Ready For GST?

Every business in India will need to comply with GST after 1st July 2017. GST rules will apply to invoicing, receipts, delivery challans and various other transactions. Tally is a GST-compliant accounting software which will help you create GST invoices, file GST returns online and do reconciliation of sales & purchases. It's very simple to use and trusted by thousands of business owners and CAs.

Return of Goods

Goods Purchased are sometimes returned to the Supplier due to various reasons similarly, goods sold may be returned by the customers. Under GST when Goods are received as an inward supply as returns by the receipt within six months from the date of invoice, the tax payable will be equal to the input tax credit availed on the inward supply. However if the goods are returned beyond six months, the rate of tax will be as on the date of return.

Supplies Inclusive of Tax

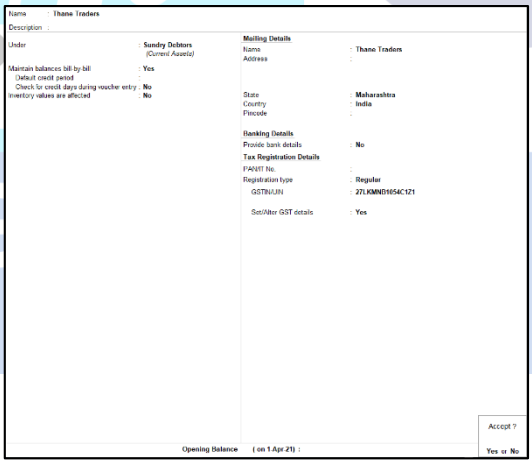

A GST-inclusive price is a price that includes GST. It is important for businesses to be able to track GST they pay on their purchases, because they can claim it against GST they collect on their sales. Businesses are not supposed to bear any cost of GST. They collect it and remit it, but they can claim back any GST they pay on purchases to run their business.

Scenario: National Trader located in Mumbai, Maharashtra decided to made local sales (Inclusive of Tax)

Defining GST Rates at Stock Group Level

If a specific group of items attract a rate different from the one specified at company level then you can also configure the HSN/SAC at the Stock Group level. The rate specified at the group level is applicable to all the items in that group.

If you would like to apply the same HSN/SAC and tax rate for different type of transactions, you can specify HSN/SAC and rate at ledger group level for Sales, Purchase, Expense and Income groups.

Inward Supplies from Composition Dealer (Purchase from Composition dealer)

Composition Scheme under GST

Composition scheme is a convenient way for small businesses to pay their taxes under GST. As per this scheme, no input tax is available to composite dealers. However, they have to pay output tax at fixed rate of their turnover. Instead of monthly returns, composite dealers need to file quarterly...

Dealers whose business turnover is less than 75 lac in the previous year comes under the composite scheme

INWARD SUPPLY FROM

(Purchases from Unregistered Dealer)

Unregistered dealer means who has not taken GST registration number then he is liable to pay reverse charge.

Reverse charge means the liability to pay tax is by the recipient of Goods & Services instead of the supplier.

Reverse charge may be applicable for both services as well as goods.

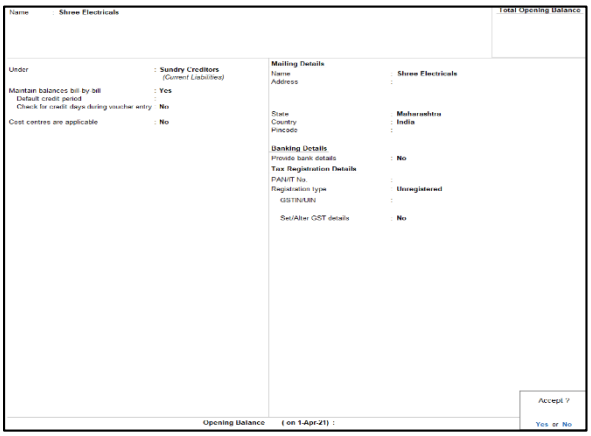

- **Scenario :** M/s National Trading Company Located in Mumbai, Maharashtra Purchased Goods from An Unregistered Dealer.
- **Journal Entry :** Purchased goods from Shree Electricals, Mumbai on Showroom.

Recording a Purchase From Unregistered Dealer

Create a new bill reference when you are purchasing the goods from an unregistered dealer and then making payment. If you have made an advance payment, then you can adjust it against the purchase invoice.

You can create invoices to track reverse charge·transactions for unregistered dealers, by creating a new voucher type with a separate series of voucher numbers, and record the purchase invoices. In the Voucher Printing screen, you can click F12: Configuration and set the options as required to print the self-invoice.

Gateway of Tally > Transaction > Vouchers > Press F9: Purchase.

Recording the Journal Voucher to Generate Liability and input Tax Credit

Since, the unregistered dealer can't collect tax, when a registered dealer purchases from unregistered dealer, he raises the liability on behalf of the unregistered dealer & pays the tax to government. The registered dealer can then claim ITC i.e.Input Tax Credit for the tax Paid.

Getting Started with GST (Service)

Introduction:

Taxable Services have been attracting service tax, levied by the Central government of India. Service tax has been subsumed by GST. Let us understand how taxation of services have been handled under GST.

Determination of Supply of Services:

Schedule-II of the model GST law provides clarity on determining the type of supply as supply of goods or supply of services this aims at eliminating the dilemma that exists in the current indirect tax system. It is, therefore, important for businesses to know whether the supply amounts to supply of goods or supply of services, and treat the supply accordingly.

Determining the Place of Supply of Services:

GST being a destination based consumption tax, tax will accrue to the state where the supply of service is consumed. Therefore, determining the place of supply is important. Unlike goods, services being intangible, have no fixed method of delivery. As The supply of service and the location of the supplier and/or the recipient can't be ascertained in every transaction.

Place of Supply of services is the location where the services has been rendered, installation or assembling happens when the address of the recipient is available. This is prevalent in a business-to-business scenario.

Based on the place of supply of service and the location of supplier, the supply can be:

- **Intrastate**: Place of supply of services and location of supply are the same.
- **Interstate**: Place of supply of services is different from the location of supply.

Creating a Service Company

Scenario: National Services is a Service Agency based located in Mumbai and want to maintain their books of A/C in Tally Prime

How to Create a Company?

Company Name	: **National Services**	Financial year beginning from	: **1-Apr-21**
		Books beginning from	: **1-Apr-21**

E-mail	: **nationalservices@gmail.com**		
Website	:		
Base Currency symbol	: ₹		
Formal name	: **INR**		

- Press **Enter** & **accept** the screen & return to **Gateway of Tally**

Transferring Input Tax Credit to GST

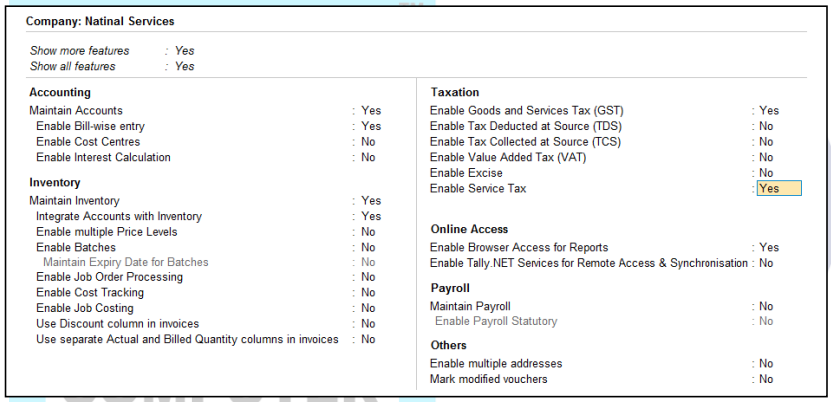

As you enable GST for M/S. Shriram Service then, you can transfer the closing balance, and continue recording day to day transactions for the company in Tally.ERP9

We can transfer the input tax credit of VAT, CENVAT, Service Tax, and Krishi Kaylan Cess & Swacha Bharat Cess to GST by recording journal voucher in Tally.ERP9. The Input Tax Credit of Service Tax and Excise is transferred to Central Tax (i.e. CGST) ledger and the Input Tax Credit of VAT, additional tax, surcharge and cess is transferred to State Tax (i.e. SGST) ledger. So, we need to record two separate journal entries for the opening balance of Central Tax (CGST) and State Tax (SGST).

- **Journal Entry:** Passing Transitional Credit on CENVAT (i.e. Service Tax Input Credit) balance.

- **Recording Transitional Credit Entry in Tally.ERP 9**

- **Go to Gateway of Tally > Press F11: Features > Statutory & Taxation**

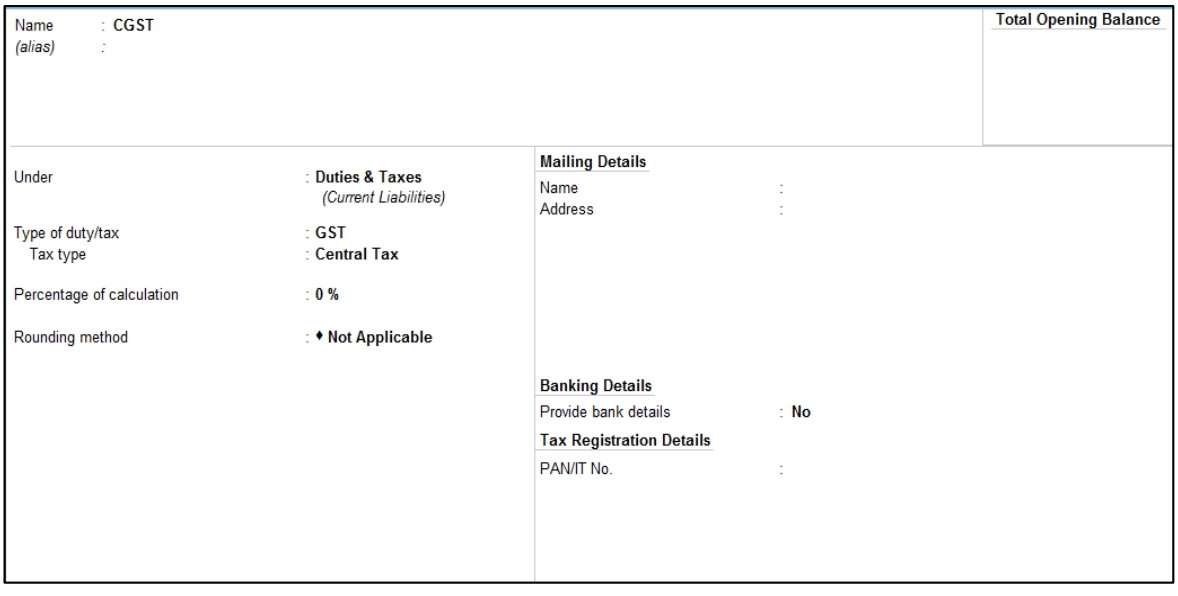

Enter the **Service Tax Details** in service tax details screen and **Deactivate** from **01/07/2021** and **accept** the Screen

Creating Central Tax (CGST) Ledger:

- **Go to Gateway of Tally > Masters > Create > Accounting Masters > Ledger.**

Name	CGST
Under	Duties & Taxes
Type of duty/tax	GST
Tax Type	Central Tax
Accept? Yes or No	Yes

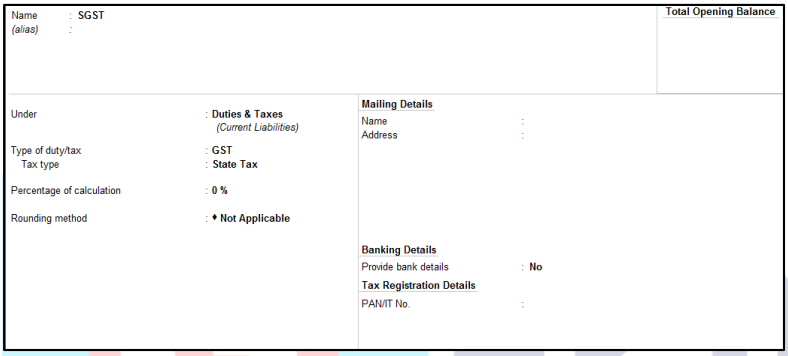

Press **Enter** & **accept** the screen.

Creating State Tax (SGST) Ledger:

- **Go to Gateway of Tally > Masters > Create > Accounting Masters > Ledger.**

Name	SGST
Under	Duties & Taxes
Type of duty/tax	GST
Tax Type	State Tax
Accept? Yes or No	Yes

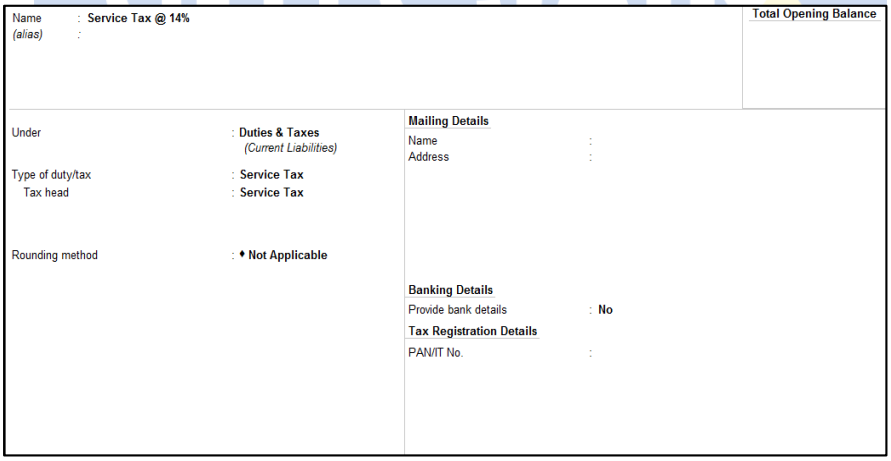

Press **Enter** & **accept** the screen

Creating Service Tax Ledger

- **Go to Gateway of Tally > Masters > Create > Accounting Masters > Ledger.**

Reverse Charge on Services.

In Reverse Charge

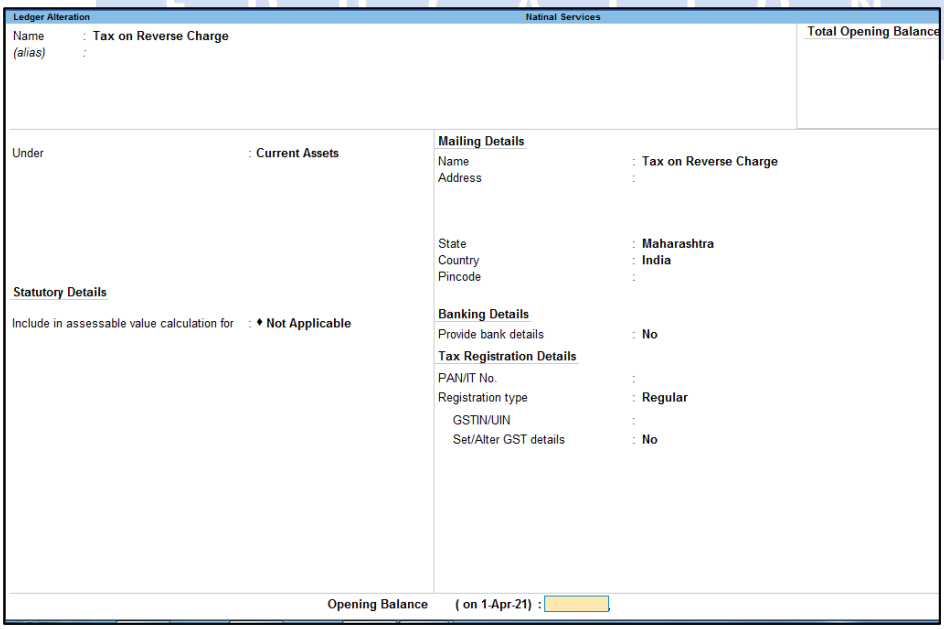

- The Recipient or buyer of goods or services has to pay Tax
- The supplier is liable to Pay Tax
- Integrated Tax is to be paid by the service recipient instead of supplier.
- The buyer has to take responsibility of paying tax in reverse charge mechanism (If buyer has purchased service from unregistered dealer)
- There are 12 services identified by the Govt. on which reverse charge will be applied Following are the 12 services

1) Import of Services
2) Goods Transport Agency
3) Legal Services provided by advocates
4) Services provided by arbitral tribual
5) Sponsorship services
6) Services provided by the government or local authority
7) Service provided by director to the company
8) Services provided by insurance agent to the insurance company
9) Service provided by recovery agent to the banking finance company
10) Transport of goods in vessel from place outside India to the customs station for clearance in India
11) Transport of copyright relating to original literary, dramatic, musical or artistic works
12) Cab service provided through e-commerce operators

As we have purchased transportation Services from Ganesh Transport who is an unregistered dealer. So, we have to increase our Tax liability because we are registered dealer, so we need to record the reverse charge transaction.

Create the Ledger by name **Tax on Reverse Charge** under **Current Assets**

Cancellation of Services

To revise the taxable value or GST charged in an invoice, a debit note/supplementary invoice or credit note must be issued by the supplier.

A debit note is to be issued by a supplier to record the increase in taxable value and the GST charged in the original invoice.

A Credit note is to be issued by a supplier to record the decrease in taxable value and the GST charged in the original invoice.

Credit notes must be issued on or before 30th September following the end of the financial year in which the supply was made OR the date of filing of the relevant annual return, whichever is earlier.

Following are the mandatory components required for cancellation of services in debit notes and credit notes.

1.Nature of the document must be indicated with high importance, such as revised invoice Name, address, and GSTIN of the supplier

2.A sequential serial number containing only alphabets and/or numerals, unique for a financial year

3.If the recipient is registered, then need to provide the details like Name, address and GSTIN/Unique ID number of the recipient

- # Time of Supply

Point of Supply is the point in time when tax has to be paid. This is a mechanism which is used to determine the point in time when the tax liability will arise. In forward charge mechanism, the supplier levies tax and remits the same to the credit of the central or state government.

- **Journal Entry: Sales Voucher: Determining the point of supply**

Place of Supply

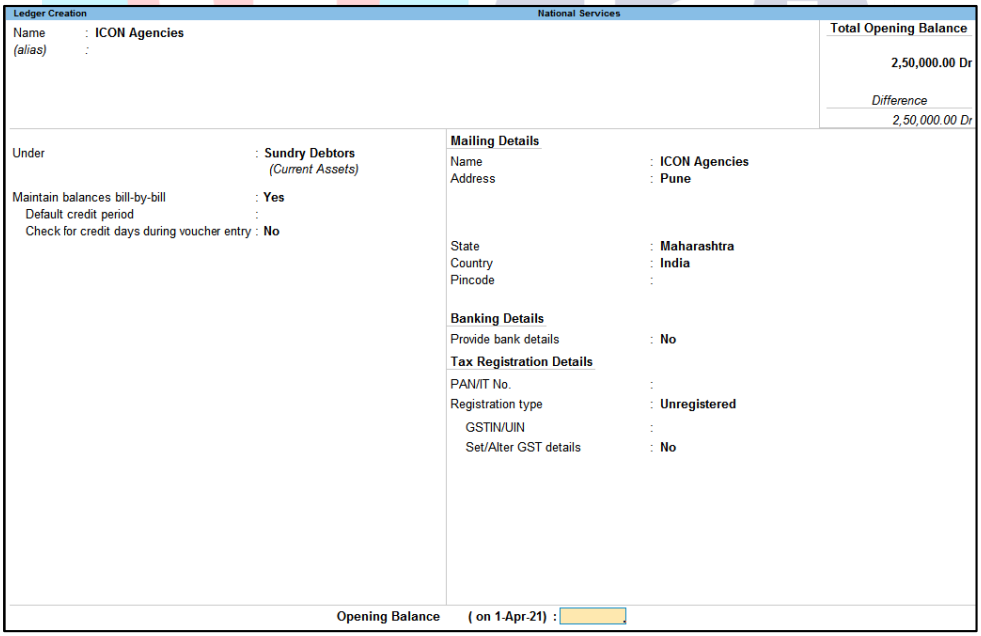

Under GST, the place of Supply of service will determine the type of tax applicable on the service. This is based on the concept of GST being a 'destination-based consumption tax', where tax will accrue to the State where the supply is consumed. Hence, it is important to determine the place of supply of services.
The rules for determining the place of supply of services are different from the rules for determining the place of supply of goods. In case of goods, the movement of goods largely decides the place of supply. Services, being intangible. Have no fixed manner of delivery. Also, in certain cases of supply of service, the location of the supplier and/or recipient may not be fixed or even ascertainable.

Determining Place of Supply of Services

When a Service is supplied to a registered person

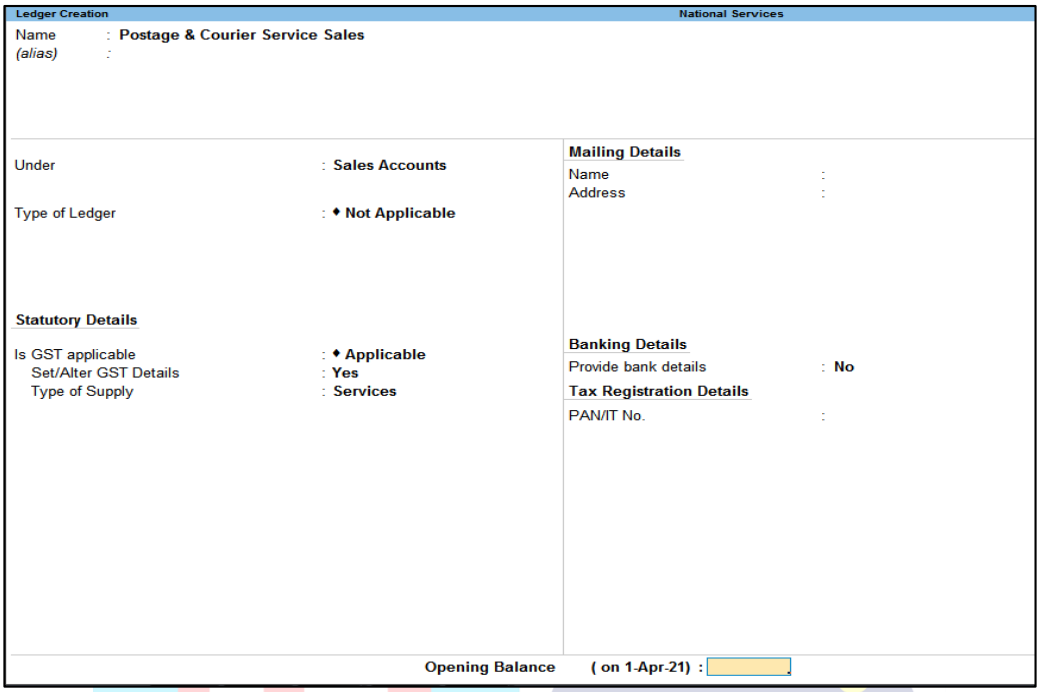

Place of supply must be determined to identify the type of GST to be charged. When a taxable service is supplied to a registered person (regular/composition dealer), the registered place of business of the recipient will be the place of supply. The registered place of business of the recipient will be the place of supply.
Within the Same State - When a service is supplied to a registered person within the same state, the taxes applicable are CGST and SGST.
Journal Entry - National Services registered in Mumbai, Maharashtra supplied Courier Services for Rs.25, 000/- to ICON Agencies based in Pune, who is an unregistered dealer and GST tax rate @ 18% for the Services with Ref. No. IA/185

Advance Receipt from Customers

Although the taxable event under GST is Supply of Goods or Services, the liability to pay taxes shall arise at the Time of Supply.

One of the events for determining Time of Supply is "Receipt of Advance" from the customer. That means a tax liability will arise even before issue of invoice or making supply to customer and as such taxes will be payable on advance receipts of payment.

GST provides the date of receipt of payment shall be the earliest of the following date:

1) The date on which the payment is entered in the books of accounts.
2) The date on which the payment is credited to the bank account.

The amount of advance receipt is assumed to be inclusive of taxes if not separately paid by the customer at the time of advance payment.

In Tally.ERP9, the advance amount received from the customers can be recorded in a receipt voucher. The receipt voucher marked as an advance receipt, can be printed with the GST details.

For any advance received for goods or services, if the corresponding sales invoice is not raised in the same month, the dealer who has received the advance has to pay the GST.

When an invoice is raised against an advance received in a different tax period, the voucher recorded for advance amount received has to be tracked against it.

Advance Receipt and Issuing Invoice in Same month

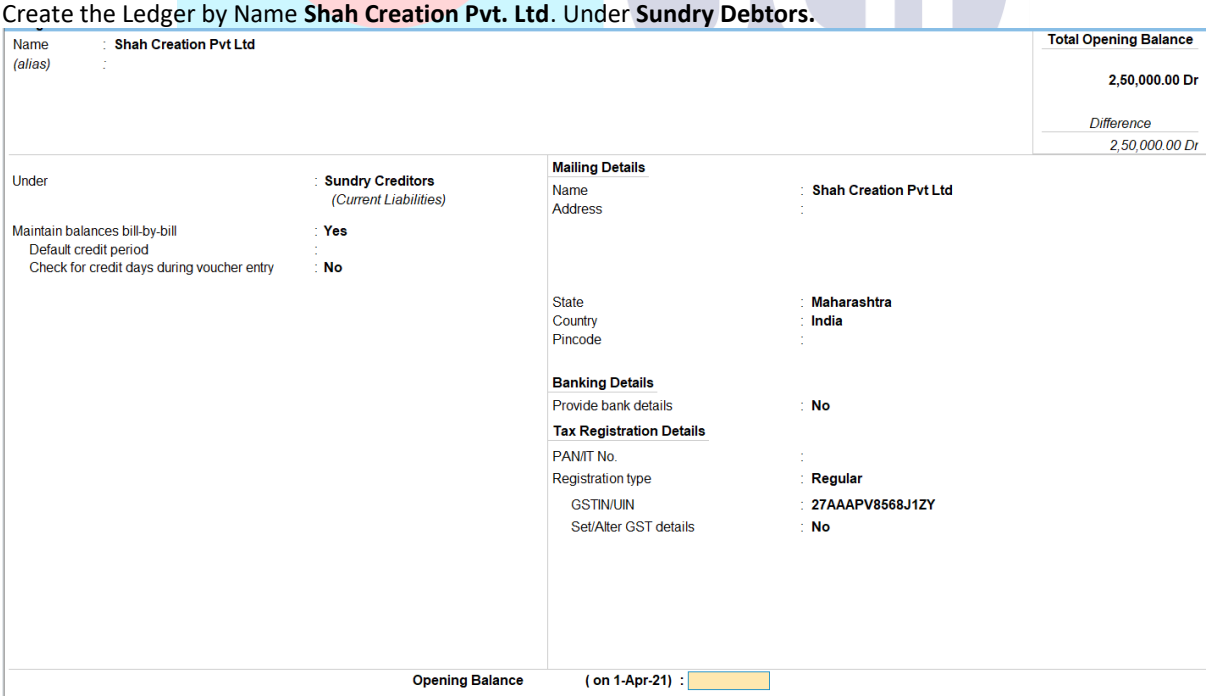

The Advance Receipt is exclusive of tax and adjusted against Sales Invoice in the same month.

Scenario: National Service decided to Record Advance Receipt from customer under GST and Issuing Sales Invoice in the same month.

Journal Entry: SHAH Creation Pvt. Ltd. Pune, Maharashtra gave advance payment of Rs.60,000/- for Insurance Service of their Company.
